

THE Gleichen Call

TWENTY-THIRD YEAR No. 7

GLEICHEN, ALBERTA, WEDNESDAY, MAY 8, 1929

SUBSCRIPTION \$2.00 PER YEAR

HISTORY GLEICHEN OIL FIELDS OF FORTY-EIGHT YEARS

It is now just twenty years ago that Mr. Dingman, pioneer of oil experts in Alberta, first came to Gleichen and later drilled here for oil, and many old-timers still vividly remember that natural gas was struck, and seeing it shoot up over the top of the derrick when lit. Mr. Dingman persevered and passed through the gas determined to drill further for oil, which he said at the time he was quite sure would be obtained when sufficient depth was attained. However, the finances of his company became low and as the company obtained a contract to supply Calgary with natural gas from Bow Island all the equipment was required to drill at Bow Island in order to get the gas piped into Calgary that fall. Thus the piping was pulled up at Gleichen and the entire plant shipped to that point. Many times since Mr. Dingman has stated to the CALL he still believed oil would be obtained at Gleichen and that it was his hope and intention yet to return here.

Since then many experts have endorsed his opinion and one company erected a derrick, but unfortunately the manager died suddenly and the company never started to drill.

However, it is stated a Vancouver company is now organizing with a view to drilling here.

It is now forty-eight years at least since the Gleichen oil field first attracted attention which will be seen by the following which appeared in the CALL Twenty years ago, April 29th, 1909:

"This is by no means a new subject in Gleichen. Some 21 years ago A. E. Jones and his brother, W. Jones, who is now an engineer, gathered samples of the formation at the 'cut banks' a mile west of town, for the Hudson's Bay Company and forwarded them to Winnipeg and the company in turn forwarded the samples to Ottawa, where they were examined by government experts, who gave the opinion the samples were the result of a gas blowout. The supposition at that time was that it was from coal gas but since natural gas has been obtained at different points east and west of Gleichen it is only natural to believe now that it was the result of natural gas.

"A visit to the 'Cut Banks' is most interesting and affords plenty of food for thought and speculation as to the cause of the great basement which at some far distant date has been torn out of the hill, leaving deep clay banks on all sides, but the east and west. On the west side of the basement it is somewhat lower than the rest of the land around the basement, save on the east side. The east though is much lower, being worn away by the water which after every rain comes down through it and on down to Gleichen, making at times quite a turbulent stream. There can be little doubt but for sometime after the blowout there was quite a lake in this basement, but in time the water wore away the east bank and leaves it as it is to be seen today.

"For the greater part the surface of the basement is now covered with white clay, but it is scattered all over with stones some of which weigh hundreds of pounds, but for the greater part they are small stones. These stones give evidence of being washed for many years by water, being very smooth. They are of lime and sandstone formation, but nearly all give evidence of being burnt and thousands of them are to be found as black as coal. Pieces of petrified wood are also to be picked up, and there are many other things that make an interesting study for the geologist as well as the ordinary individual."

Gleichen's annual Empire Day sports promises to be bigger and better than ever.

MAIN HIGHWAY NOW SETTLED THROUGH GLEICHEN

A survey party is now located in Gleichen and already has started the survey of the Canadian Highway from Gleichen north. Four miles north of town the Government has purchased a corner from Mrs. H. W. Lee to make a round turn west at that point, and have also secured another corner of land from Ralph Umbrite one mile west just above the small hill, which will avoid the descent of this hill on the turn north again to the twelve mile road from where the road goes direct west into Calgary. Improvements is said will be effected from Gleichen east to Cluny and the road turn at Telford's corner will also be rounded off the same as the other turns north. This settles the long dispute of the exact location of this main highway east and west.

WINDBURN LATEST ENEMY TO FEMININE COMPLEXION SAYS ANTIA PAGE

Sunburn, curse of the beaches, has been woman's problem for some time past, but now in this modern day of strenuous outdoor sports that require speed, there's another one. The automobile, and now the airplane, have added windburn to the list of enemies to a woman's complexion.

Every year sees speedier automobiles, and every day now sees more women going in for aviation. Of course, the big closed passenger ships don't count, but the open sport models in the airplanes do.

While we were filming "The Flying Fleet" at the San Diego naval base, Ramon Navarro arranged with some of the officers to take me up. It's the most thrilling of sports. But I soon found the windburn is the penalty for cruising at 160 miles an hour in the sky.

Other girls at the Metro-Goldwyn-Mayer studios told me the same thing—all who have flown, in fact, and those who drive swift cars.

The treatment is much like treating sunburn—and the preventive is as simple. Before any such rides use cold cream, rub it in well and wipe it off, or use a good grade of liquid make-up. This protects the skin from the drying effect of the wind, which is really what causes windburn. There are several very good preparations to be had in any drug store to prevent windburn, and it is always well to carry one of these if one does much speeding.

We had a wonderful time, flying and making the picture, in which Navarro plays a naval aviator. Most of his scenes were filmed in the air—I only went up as a passenger. But it sold me on aviation for life; that is as soon as I found out how to get around the windburn thing.

The "Flying Fleet" will open at the Gleichen Community Hall, May 11th.

OBITUARY

The death of Alexander McRae occurred at Mrs. Cook's Hospital early Saturday morning last, May 4th. He has been ailing for many months past and returned last fall from Vancouver, where he went for a short time in hopes that a change of climate might be beneficial.

"Alex", as his hundreds of friends throughout the Gleichen district familiarly addressed him, came to Gleichen first in 1906, and was a skilled carpenter by trade and his services were in demand far and wide, being a very steady reliable man who could be depended upon at all times.

He was born at Goderich, Ontario 61 years ago, and spent a number of years in the west before settling permanently at Gleichen. He is survived by a brother and sister, Mr. Daniel and Miss Cathleen McRae, both residing now in Vancouver. The sister is at present in a hospital which made it impossible for either to come to Gleichen to attend the funeral, which however was well looked after by his friend Alderman S. D. Milliken, assisted by other friends and local Or-

Sports Program

As will be seen below the program for the Empire Day of Sports includes items that will please every person and it is hardly necessary to add that the various committees appointed are doing all they can to carry off the program in good style in order that there will be no lost time.

Boys and Girls	6 to 7 years	25 yds.
Girls Race	7 to 9 years	25 yds.
Boys Race	7 to 9 years	25 yds.
Girls Race	10 to 12 years	50 yds.
Boys Race	10 to 12 years	50 yds.
Girls Race	13 to 15 years	75 yds.
Boys Race	13 to 15 years	75 yds.
Girls Race	16 and over	75 yds.
Boys Race	16 and over	75 yds.
Girls Open	Bicycle Race	150 yds.
Boys Open	Bicycle Race	150 yds.
Girls Open	Three-Legged Race	
Boys Open	Three-Legged Race	

FOUR TEAMS BASEBALL TOURNAMENT

1st Baseball Game at 1 p.m.; 2nd Baseball Game at 3:30 p.m.; 3rd Baseball Game at 6:30 p.m. 2:30 p.m.; Children's Sports

Admission: Adults for entire day 75c... Children 25c.

Admission to Night Ball Game only, 50c.

Dance in Gleichen Community Hall

Gentlemen \$1.00 Ladies FREE

Dance Supper Served by the Gleichen Ladies

Angelenon of which society he was a member for many years.

The funeral services were conducted by Rev. Mr. Davies in St. Andrew's Church after which over sixty friends followed the remains to the Gleichen cemetery under the direction of Geo. W. Evans.

GLEICHEN I.O.O.F. CHURCH PARADE

The officers and members of Gleichen Lodge No. 144, I.O.O.F., held their annual church parade eighteen strong on Sunday last, May 5, and attended the evening service in St. Andrew's Church, which was conducted by the Rev. Davies.

Rev. Mr. Davies spoke of the good that can be accomplished by lodges, organizations or towns and cities, for the community by the members trying to live according to the aims and obligations of their orders, both in and out of the lodge room. He said that a great many people do not believe in secret societies, but he claimed that the lodges of today were not secret societies, but societies with a secret as everyone knows that lodges exist but do not know their secrets and aims.

He also mentioned that a great many criticize lodges today because some member wanders from its teachings and he hoped that the I.O.O.F. membership would ever bear this in mind. At the conclusion of the service the Lodge members marched back to I.O.O.F. Hall.

M. Murray is in Calgary taking electric treatments for rheumatism which has caused him a great deal of pain of late and his friends hope for his early recovery.

The members of Golden Jubilee Lodge K. of P. entertained about thirty-five guests in the Oddfellows hall Monday night at a whist drive, dancing and games which lasted until nearly three a.m. The whist drive was won by Mrs. Heimbecker, who was presented with a sack of sugar and Mr. Ed Menard a pair of jam as winners of the first prizes, while Miss Schriber and Mr. Sammons each carried home a head of cabbage as consolation. The egg and potato races were both won by Miss Sammons, who will have something good to treat her friends with for sometime to come. Much credit is due Messrs. Grant and Guttrath, who generously supplied the music free.

Gleichen needs a few more championships. Let us try baseball next.

UNITED CHURCH LADIES CIRCLE

The Ladies Circle of the Gleichen United Church are planning on a sale of aprons, home-cooking and afternoon tea on Saturday, May 11th. Final arrangements were made at a meeting held at the home of Mrs. Batts. Mrs. Henderson was in charge of the meeting with the following ladies present: Mesdames J. Bolinger, Glen C. House, Taylor, Mattson, Wade, Corcoran, Henderson, Sather, R. K. Hunter, Batts, Sutermeister and Thorburn. Mrs. Thorburn gave a paper on Mother's Day and the influence of great mothers, which was very instructive and much appreciated. Mrs. Corcoran is the secretary of the Circle at the present time, while Mrs. Henderson is the president and Mrs. Brown is the treasurer. A delightful lunch was served.

The Cluny Gun Club are managing a crow and magpie drive at Cluny. Get all you can of these birds. They destroy our game birds eggs and nests. Write the secretary for particulars.

Mrs. Alcock of Champion, district director of the Women's Institutes, will address a meeting of the Gleichen Women's Institute early in June, to which all the ladies of Gleichen and district are invited to join in a social evening.

A few of the ever faithful turned out Monday night and planted a number of trees around the Auto Park.

The existing tax on low priced tickets of admission to such places of amusement and entertainment as moving picture houses, chautauquas, etc., has been cancelled by a recent order-in-council of the Alberta Government. Admission prices not exceeding 25c. will hereafter be exempt from tax, the only exception being places for public dancing. The order is to be effective on June 1st. No change will be made in the case of tickets for which more than 25 cents is charged.

An intensive soil survey of the Lethbridge Northern Irrigation district will be undertaken within the next few weeks. A classification of the lands in the district will also be made with a view to ascertaining the productive capacity of each quarter section in the district. The work will be carried on under the direction of Stephen Ward who has had a number of years experience in this type of survey with the department of soils at the University of Alberta.

SOME GOOD USED CAR VALUES

1927 Essex Coach \$650
1926 Ford Coupe \$350
1925 Ford Coupe \$250
1929 Graham Bros. 1 1/4-ton truck \$1500

These cars have been thoroughly overhauled.

Fresh Water Tiger

5 pound muskie captured by G. Clark of Toronto after an hour's fight with a light rod and nine pound test line

Fishermen differ as to the fighting merits of the various species of the finny tribe to be found in North American waters. Some claim that, inch for inch and pound for pound, the small mouth black bass is the gamest fish that swims; others are equally enthusiastic in praise of the speckled brook trout; while still another fraternity claim that the salmon puts up as noble a battle for liberty as any game fish. All are agreed, however, that the muscalunge, sometimes called the "fresh water tiger" is one of the greatest fighters known to anglers, and that he will put up a battle royal when attached to the business end of a rod.

One of the productive muscalunge streams in North America is French River, in Ontario, Canada, which connects Lake Nipissing on the East with Georgian Bay on the West. This tangle of waterways is not only the haunt of fighting muscalunge but it yields small and large mouth black bass, great northern pike of enormous size and pickerel in abundance, as well as pan fish. Not long ago a prominent New York business man landed a 65 pound "muskie" after a battle which will probably satisfy his quest for a thrill for the rest of his life.

French River is two hundred miles north of Toronto on the Sudbury Line. The French River Bungalow Camp, a series of cozy individual bungalows centering around a main club house, provides comfortable accommodations for the angler and his family. Jack Strathdee, manager of this angler's retreat, is a genial host who is glad to give the uninitiated fisherman a few tips on how to lure the wily "muskie." French River Bungalow Camp has as its adjunct Pir Rapids Camp, some 20 miles up the river, and located just at spot where the "whoppers" are likely to lurk.

Chicago is planning a 75-storey building. Chicago people simply have to go up to keep away from the gangsters.

Everything in the world has its

decisive moment; the crowning achievement of good conduct of life is to know and pick out that moment.

Don't wait for your opportunity—make it.

Town of Gleichen

All householders are hereby ordered to burn up all weeds and rubbish and to have all garbage in and around the property occupied by them removed to the nuisance ground before May 15th.

M. MURRAY,

Secretary-Treasurer

DOMESTIC ANIMALS ACT

The provisions of the above act are in force all the year round and owners permitting cattle, horses, or other livestock, including chickens, to run at large in the town of Gleichen will be prosecuted.

M. MURRAY,

Secretary-Treasurer.

Made with the co-operation of the U. S. Navy, this epic film is a true record of the laughs, the loves, the heroism, the countless thrills and dangers of the naval flyers.

A plane afire miles in the air! Breath-taking moments never before brought to the screen! The star of "Ben Hur" in another great romance!

DON'T MISS THIS

Will Defer Discussion Of Reduced Naval Power Until a Later Date

Geneva.—Complete agreement has been reached by the big five naval powers to refrain from detailed examination of the naval problem at the present session of the preparatory commission for a disarmament conference. It was learned here in responsible circles.

The question of reduction of the fleets as a supplement to the Washington naval treaty will be adjourned to a date which will be left unfixed. Meantime, the five powers will continue conversations on the naval problem. The form of these conversations was understood to be not yet determined, but would presumably be exchanges of notes between the five nations.

These may possibly develop into a meeting of experts from Great Britain, the United States, Japan, France and Italy.

The main theme of these conversations will be the American suggestion for agreement on the formula for estimating the equivalent tonnage of cruisers, destroyers and submarines by considering such factors as age, units, displacement and calibre of guns.

It was understood that Japan in particular, the most distant of the five countries from Geneva, wants ample time to study the American ideas, which are understood to be received by the powers generally with favor.

Tribute To Wheat Pool

Reference Made To A. J. McPhail In United States Senate

Washington.—Running through much of the discussion of the farm relief bill in the Senate are references to the Canadian Wheat Pool and its workings as explained recently before the Senate committee on Agriculture by A. J. McPhail, of Regina, head of the Pool. It was frequently pointed out in the debate that the stabilization corporations under the pending farm relief bill are expected to function much as the great co-operative pool of Canada functions.

Senator Norbeck, of South Dakota, prominent member of the Senate committee on agriculture, paid high tribute in a speech recently to Mr. McPhail. Senator Norbeck said Mr. McPhail was sincere and careful in his statements. He emphasized, however, that the Canadian Pool had not brought Canadian wheat farmers a very large increase in prices.

Senator Norbeck, in summing up, said Mr. McPhail stated frankly that the big result of the Canadian wheat pool was the better spirit of co-operation that had been developed among the farmers. He did not count the small additional price they had secured as the most prominent reward.

Canada Had Good Year

League Review Shows Dominion Enjoying Unprecedented Prosperity

Geneva.—"Canada enjoyed a year of unprecedented prosperity," says the Review of Economic Conditions in 1928, issued by the League of Nations, as a basis of the work of the consultative economic committee.

North America, the report continues, it seems probable was the continent where trade developed most rapidly. The United States not only maintained its position of the world's leading commercial country but increased its excess of exports over imports.

Need Coal Agreement

Geneva.—The economic committee of the League of Nations, which has made exhaustive investigation of the world crisis in the coal industry, reported that international agreements between producers concerning output and markets must be made if there is to be hope for improvement. A similar conclusion was recently reached by experts on the sugar situation.

Loyalty Of Acadians

Ottawa, Ont.—In replying to the criticisms levelled against him in the House of Commons, Hon. Peter Veniot, in a spirited speech dwelt on the loyalty of the Acadians of which he was one, to the British crown. He did so, he said, because his loyalty had been attacked by certain newspapers.

W. N. U. 1754

CENSURE MOTION IS DEFEATED BY MAJORITY OF 24

Ottawa.—The House of Commons defeated another want of confidence motion involving censure of the postmaster-general. This time the amendment, which, like its predecessor, was moved by H. A. Stewart, Conservative member for Leeds, was defeated by 24 votes.

It was a general amendment declaring that "the administration of the post office department by the present postmaster-general has been characterized by inefficiency, disregard of the provisions of the civil service act, the post office act and other statutory authority, and merits the disapproval of this House." Mr. Stewart's former amendment, moved a few days ago, involved censure of the postmaster-general in connection with the appointment of a postmaster at Simcoe, Ont., it was defeated by 27 votes.

In the division today, the Conservatives carried with them in support of the amendment the majority of members of the U.F.A. group in the House, Liberals and Liberal-Progressives united in opposition to the amendment.

Votes recorded in favor of the amendment numbered 68, and against, 92.

In moving his amendment Mr. Stewart said facts had been brought out which had startled the country. The whole background of the matter was the civil service commission, and the attitude of the postmaster thereto. From October 1, 1926, to February 1, 1928, the postmaster-general has dismissed 98 postmasters, and from February, 1928, to April, 1929, eight more dismissals had been made.

In 32 cases of appointments by the commission, rejections had been made by Mr. Veniot. In some cases returned soldiers had been rejected in favor of civilians. He had dismissed for petty shortages men and women of the postal department all over Canada, but in the case of an inspector who it was shown had taken funds improperly, Mr. Veniot had not only increased his salary, but had given him an higher responsibility in office. The postmaster-general had impaired the efficiency of the civil service commission, and his attitude toward it was akin to contempt.

In reply, Mr. Veniot declared Mr. Stewart had omitted to point out in what way his administration was inefficient, or in what manner he had violated the civil service or any other act.

It was charged, he added, that he had disregarded certificates issued by the civil service commission. That was correct. But he had done so only for valid reasons, and was given authority to do so under the act. He had only done his duty, said the postmaster-general, as head of the postal service of Canada.

There had been charges which questioned his loyalty. These were unjust, Mr. Veniot said.

Would Welcome Naval Reduction

Tokio.—It was learned here that Count N. Sako, Japanese delegate to the preparatory commission on disarmament at Geneva, had been instructed to agree to a proposal whereby a sub-committee would be formed by delegates from the five leading powers to consider proposals of the United States delegate, Hon. Hugh S. Gibson, for broad naval reduction.

Tynside Trainees

Immigrants from Great Britain arriving on board the Canadian Pacific Liner "Duchess of Richmond" at Saint John on that vessel's first voyage to Canada. The men, who hail from Tynside, have all been trained in Canadian farming methods under the British Minister of Labor, in co-operation with the Canadian Pacific Railway. They are destined for all parts of Canada.

WESTERN PILOT

Louisa Burke, a student with Great Western Airways, Ltd., is believed to be the first woman pilot in Western Canada to take a passenger up in an aeroplane.

Plan Second Air Derby

Winnipeg and St. Paul Will Stage Event This Month

St. Paul, Minn.—The second international air derby from St. Paul to Winnipeg was set for May 24 and 25. More than 25 planes are expected to enter this race, according to Julius Perit, aviation secretary of the St. Paul Association. The derby will be held in conjunction with the Canadian aviation meet and aircraft exhibition to be held in Winnipeg on the same dates.

The derby will leave St. Paul, May 24, and will arrive in Winnipeg the following day. The route is expected to take in Fargo and Grand Forks, N.D.

Announcement of the date of the derby was made following the visit to St. Paul of several members of the Winnipeg Flying Club on a goodwill tour to arouse interest in their air carnival.

The first air derby from St. Paul was staged last May as a goodwill tour to Winnipeg.

Aviators Found Dead

Two Australians Meet Fate In Search For Lost Southern Cross

Sydney, N.S.W.—Suffering agony from thirst and exhausted by desperate efforts to take off from the ragged ground where they landed, Robert Hitchcock and Lieut. Keith Anderson of the aeroplane Kookaburra died some time either on or after April 12.

The grim story of the fate of the two men who had taken part in the search for the aeroplane Southern Cross, was revealed in the notes of a diary scrawled on the rudder of their plane.

First definite news of the death of the men came with the report from a land party that had made its way over the rough country to the stranded rescue plane.

Miner's Fund Closed

London, Eng.—The Lord Mayor's fund for distressed miners, was closed after it had reached \$4,251,000. To this amount the government pound-for-pound grant must be added. The total amount for relief will therefore be \$8,430,000.

Postpones Long Flight

Berlin.—Captain Helmann Koehl, noted German trans-Atlantic flier, told the Associated Press that his projected flight to the United States with Col. James Fitzmaurice, could not be expected this year and possibly not for another two years.

Battle With Bandits

Detroit Policeman Shoots Assailants In Attempted Hold-Up In Ontario

London, Ont.—Shot in the stomach, Robert Schact, alleged bandit, aged 20, Windsor taxi driver, and formerly of Yorkton, Sask., died on the highway, following an attempted hold-up of D. McLellan, a Detroit policeman and his wife, who were motoring on a holiday. Leo Derosches, 19, Ford City, Ont., was shot in the hip and lies in a London hospital under guard. A third bandit got away in the darkness.

On a crime cruise in a stolen car, Schact and his companions crowded McLellan's car into the ditch. Schact ordered the Detroit policeman to hand over his money. He picked the wrong man. McLellan for an answer ripped out a .32 revolver and fired twice from the hip. Schact dropped to the road mortally wounded, along with Derosches. The third bandit picked up Schact and half carrying him, vanished into the darkness.

Prairies Not Represented

Have No Men On This Year's Bisleys Team

Ottawa.—The personnel of the Canadian Bisleys team has been announced from the office of the Dominion of Canada Rifle Association. There are five Toronto men on the team this year. Ottawa comes second with three, while Victoria and Vancouver have two each.

Five riflemen, including two from Hamilton, who won places on the team, have been unable to accept and the five next in order in the Bisleys aggregate, fired during the D.C.R.A. matches last August, will go in their stead. The team sails from Montreal on the S.S. Montrose, on June 12 and will be inspected the day previous.

Those who made the team, but who found it impossible to accept, included Sergt. H. W. Burton, Victoria.

FAVOR PRINCIPLE OF INSURANCE FOR UNEMPLOYED

Ottawa.—The principle of insurance against unemployment, sickness and invalidity is accepted and endorsed by the special committee of Parliament on industrial and international relations in a report presented by its chairman, Cameron R. Macintosh, Liberal, North Battleford, in the House of Commons. The insurance should not be based on compulsory contributions derived from the state, employer and employees, the report states.

The report continues: "Your committee recognizes that, while it is highly desirable that such legislation should be uniform in all the provinces, and while social insurance has a federal aspect, nevertheless, according to the department of justice, under our constitutional legislative jurisdiction in relation to the establishment of a compulsory system of unemployment insurance is vested exclusively in the provincial legislatures.

"Your committee finds that the provinces, on being consulted by the department of labor with regard to their attitude towards the establishment of a general scheme, do not appear to be prepared to take immediate action.

"Under these circumstances, your committee submits the following recommendations:

"(a)—That with regard to sickness insurance, the department of pensions and national health be requested to initiate a comprehensive survey of the field of public health, with special reference to a national health program. In this, it is believed that it would be possible to secure the co-operation of the provincial and municipal health departments, as well as the organized medical profession.

"(b)—That in the forthcoming census, provision should be made for the securing of the fullest possible data regarding the extent of unemployment and sickness; and that this should be compiled and published as early a date as possible.

"(c)—That the federal government be requested to bring the subject matter of this reference before the next federal-provincial conference; and your committee suggests, when the agenda for such a conference is arranged that the provincial governments be invited to send representatives of the employer and employee to discuss the subject matter of this report."

Well Equipped Vessels Will Be Commissioned For the Bay Route

Canoe Trip Across Canada

Two Montreal Youths Commence Journey From Vancouver

Vancouver.—Paul Paquin and Richard Lesage, two Montreal youths, started out recently on what they hope will be a canoe trip across Canada. Their 16-foot canoe was laden with camp equipment and supplies as they pushed off from the recreation pier at English Bay to the farewells of a crowd which had gathered to wish them "bon voyage."

The canoeists plan to travel up the Fraser River to Lytton and from there up the Thompson River to Sicamous, as the first part of their trip. They expect to reach Halifax in seven months.

Britain's New Dirigibles

Two Air Ships Will Be Soon Ready For Trial Trips

London, England.—Britain's new dirigible R-100 will be ready for a trial trip by the end of May, and the R-101 by the end of June.

Sir Samuel Hoar, air minister, made the announcement in reply to a question in the House of Commons. Sir Samuel was asked when the airship would make its first voyage. His answer referred his questioner to the answer he made on April 16. On that occasion he expressed hope that the R-100 would be able to fly to Canada, and the R-101 to Egypt and India, "some time in the autumn."

SUNDAY SCHOOL LESSON

MAY 12

THE EARLY MINISTRY OF JEREMIAH

Golden Text: "We must obey God rather than men."—Acts 5:29.

Lesson: Jeremiah 1:1-10; 6:10, 11; 8:18; 9:2; 23:1-24.

Devotional Reading: Psalm 26:1-7.

Explanations and Comments

Jeremiah's Call and Consecration, 1:1-10.—Jeremiah was the son of Hilkiah (not the Hilkiah who found the book of the law, our last lesson), a priest in the little town of Anathoth, near Jerusalem. Jeremiah's name ("appointed by God"), and his father's ("Jehovah is my portion"), are tokens of the family's loyalty to the God of Israel. "At a time when the outburst among the Jews of a very different class of personal names betrays on the part of many a lapse from the true faith, and when the loyal remnant of the people were being persecuted by King Manasseh."

In the thirteenth year of Josiah's reign (about 626 B.C.), Jeremiah became conscious of a divine call to the prophetic office. It is natural to understand that Jeremiah had long meditated upon his country's sins, had felt impelled to witness against them, but was most reluctant to undertake the task. The inward struggle which took place in his sensitive and shrinking heart when something different from his ordinary consciousness made him certain that he was destined to be the prophet of woe, he tells in the form of a dialogue between God and himself.

Jeremiah speaks: "Ah, Lord Jehovah! behold, I know not how to speak; for I am a child." Jeremiah was not a child in years, but in consciousness of ability. He distrusted himself at the moment of his call. Once it was a Moses, then it was a Gideon, then an Isaiah, and now a Jeremiah, all of whom re-echo the plaint of their own untidiness. But although their first reaction was like that of Hamlet when he cried:

"The time is out of joint;—O, cursed spite! That ever I was born to set it right."

yet with them all there was no delay in rendering themselves more fit for their tasks.

"There is a lesson here for all who feel in any degree the tyranny of their outward lot. There are hard facts against which we chafe and fret. We are set to tasks which we would fain refuse, or we are placed in surroundings which we think unsuitable. We are all tempted to turn to the easy ways of escaping the burden. We can learn from Jeremiah the paramount claims of duty. If it be the will of God that you must tread a path that you choose not, from which the weak heart shrinks, know that the blessedness promised by Christ is yours, and cherish the thought of a closer communion with Him who also was made perfect through suffering."—Hugh Black.

Jeremiah speaks: "Say not, I am a child; for to whomsoever I shall send thee thou shalt go, and whatsoever I shall command thee thou shalt speak. Be not afraid because of them; for I am with thee to deliver thee." "Jehovah put forth His hand and touched my mouth;" thus Jeremiah years afterward expressed the thought of how burning were the words of Jehovah which seemed to come to him.

Ottawa.—Adopting the annual report of the Canadian government merchant marine, the parliamentary committee on railways and shipping canvassed the whole of the government's shipping activities.

A suggestion by Hon. H. H. Stevens, Conservative, Vancouver Centre, that Sir Henry Thornton, president of the company, address himself to the task of reconstructing the finances of the C.G.M.M. with a view to eliminating the deadweight losses incurred year after year met with Sir Henry's approval.

He was giving that matter his consideration, he said. Hon. C. A. Dunning, minister of railways, asked if Mr. Stevens would support such a project if it were brought down by the government next year, and Mr. Stevens replied in the affirmative.

The commercial value of the Hudson Bay was discussed, but Sir Henry was opposed to Mr. Stevens' suggestion that the smaller boats of the company be put on that route in the beginning in order to demonstrate its feasibility. Mr. Dunning felt that in order to give the route a real "try-out" it would have to be done with vessels better equipped than the government steamers. He was confident however, that when everything was ready a proper trial would be given.

So far as the feasibility of the route was concerned, this had been demonstrated by the department of railways and canals whose ships had constantly gone into Hudson Bay. Mr. Dunning, expounding on the advantage of the route, cited how one ship, not belonging to the C.G.M.M., had loaded 3,000,000 feet of lumber at Vancouver, had come via the Panama Canal, and discharged its cargo at Churchill. An analysis of the costs showed that it was cheaper to transport the lumber in that way than to bring it in by rail from Vancouver to Churchill, even if the railway had then been laid to Churchill.

When the port was ready to ship grain there would be means found to carry it, said Mr. Dunning. The situation was unique. Most ports had grown, like Topsy, but this one had been made.

'Plane Races Thousand Miles To Hospital

Carried Wom Critically Ill From Alaska To Seattle

Seattle, Wash.—Ending a one thousand mile race against death, the aeroplane Janeau landed here with Mrs. Peter Kostrometoff, of Sitka, Alaska. A waiting ambulance rushed the woman, who was in a critical condition from septic poisoning, to hospital. The woman was brought in the plane from her Sitka home to Seattle when physicians said she had no chance of living unless afforded expert treatment and hospital facilities such as were unavailable in Alaska.

Reject Optional Clause

House Of Lords Voted Against World Court Compulsion

London, England.—A motion by Lord Cecil inviting the House to express the opinion that the time had arrived when Great Britain should sign the optional clause of the statute of the world court, was rejected by 26 to 19, after an important debate in the House of Lords.

By the clause, states recognize the compulsory jurisdiction of the court, namely the right of one party to summon another before the court.

China's Name For Hoover

Peking.—President Herbert Hoover has been given a new and more honorable name by the Chinese press since his assumption of the Presidency. The old name was "Hua-wa," and had no special meaning. The new name "Ha-hwa," contains the character for Buddha, and is extremely "honorable." Both names are an attempt to reproduce Mr. Hoover's name into Chinese characters.

Punished For Native's Death

Pretoria, South Africa.—For the first time in many years a white farmer was flogged for injuring a native. Jack Nafte, who tied a native employee head downward by the legs from a tree and lashed him so severely that he subsequently died, was sentenced to seven years at hard labor and the farmer received ten lashes in the Pretoria jail.

DIFFERING OPINIONS

It is quite natural that persons
who have decided opinions on any
subject should try to bring every-
one else to their way of thinking.
In their zeal to vindicate their own
opinions many refuse to admit that
there may be some virtue in the
opinions of those who hold dif-
ferent views.

In cases where the issue is a clear-
cut, one, involving right and wrong,
it may be that an uncompromising
attitude is justified. But who shall
say just what is right and what is
wrong? Ideas concerning right and
wrong change with the times.

Not so many years ago some of
the most cultured and enlightened
people in the world believed that
human slavery was legitimate and
proper.

The Puritans thought it wrong
for a man to kiss his wife on Sun-
day, and they passed a law prohib-
iting him from doing so. We think it
all right today.

If everyone had agreed with such
ideas and no one had ever mustered
up the courage to combat them,
we should have made little progress.
We would still be burning witches.

What is needed in the world is not
that we should all think alike, but
that we should have a greater feel-
ing of tolerance and respect for the
opinions of others when honestly
held, no matter how much they may
differ from our own.

The average normal person is
really seeking for the truth—but the
truth is often elusive and each must
find it in his own way.

WE LIKE TO GET THE LOCAL NEWS

The main aim of the weekly news-
paper as the name implies, is to give
news of its own district. It may
have other aims, such as to give the
merchants a chance to tell of their
goods in its columns or to try to in-
fluence public opinion through its
editorials; but first of all it must give
the news. Some of this news is not
easily obtained and no editor can
cover it all without assistance. Es-
pecially is this true when you have
visitors. Many of the ladies think
that persons are the most interest-
ing reading in the whole paper. Your
visitors are usually glad to have their
names appear, so send them in. Some-
times people come in and give the
impression that they are asking a
favor when they want us to insert the
names of their friends who have been
spending a few days with them. No
person need feel that way about giv-
ing us news items for we are glad to
get them all.

ALBERTA WILL CO-OPERATE IN RADIO CONTROL

Co-operation on the part of the Al-
berta Government was assured the
members of the Royal Radio Commis-
sion at their session in Edmonton dur-
ing the past week.

"The government of Alberta" stated
Premier Brownlee, "is ready and will-
ing to enter into negotiations with the
government of Canada and the govern-
ments of the various provinces with a
view to the organization of radio
broadcasting on a basis of public ser-
vice by some method that may be mu-
tually agreed upon by the said govern-
ments."

EXTENSIVE DEVELOPMENT OF TAR SANDS PLANNED

Extensive investigation of the bitu-
minous sand deposits in northern Al-
berta will be undertaken as the first
step in the two-year program of de-
velopment of this valuable Alberta re-
source by the Scientific and Indus-
trial Research Council of Alberta. The
work will be conducted under the di-
rection of Dr. K. A. Clark of the Un-
iversity of Alberta who for the past
several years has devoted much time
to investigations along this line. The
two year program of tar sands devel-
opment is an additional feature of the
Alberta Government's comprehensive
plans for northern development. Keen
interest is also being shown in the soil
survey under the direction of Dr.
Wyatt, the water survey carried on
by Dr. Cameron during the coming
season.

When in the darkest moment of de-
spair, it's often the time that help is
nearest.

PREPARATIONS MADE FOR MANY SCHOOL FAIRS

Thousands of school children all over
the province will shortly commence
preparations for their district school
fairs as the result of the distribution
of seeds recently completed by the De-
partment of Agriculture. Included in
the seeds distributed to school fair
centres at Claresholm, Olds, Sedge-
wick, Vermillion and Raymond are
1,435 pounds of peas, 1,265 pounds of
seeds, 565 pounds of turnips, 780 lbs.
of carrots, 970 lbs. of mangels, 505 lbs.
of parsnips and 805 lbs. of sweet peas
as well as 32,500 packets of asters,
13,800 packets of stocks and 22,300
packets of cabbage seed. Last year
a total of 115 school fairs were held
throughout the province and it is ex-
pected that this number will be some-
what increased during the coming
season.

CANADA CANNERS BIGGEST SARDINE PLANT IN EMPIRE

Sardines are small fish but they
mean big money, in the total, in Can-
ada's Atlantic Coast fishery produc-
tion, and through the season in New
Brunswick they keep busy the largest
sardine cannery in the British Empire.
The cannery is at Black's Harbor on
the Charlotte county coast of New
Brunswick, the province where by
far the greater part of the Canadian
sardine fishery is carried on. A
small catch of sardines is also taken in
Quebec and some of the fish are also
caught in Nova Scotia waters. The
marketed value of the Canadian pro-
duction is over a million dollars a year.

Statistics compiled by the Fisheries
Branch of the Department of Marine
and Fisheries show that the total
catch of sardines in 1928 was 59,798,
200 pounds—a big increase over 1927
when 32,936,000 pounds were landed.
The 1928 catch had a landed value
of the fishermen of \$340,325 as com-
pared with \$202,056 in the previous
year.

CANNING COMPANY EXPECTS BUSY SEASON

Eighteen tons of dried peas shipped
into Taber during the past week will
be distributed throughout the district
and seeded on some 400 acres of land
leased by the Border Canning Co., of
New Westminster and Edmonton. In
addition, a large amount of seed will
be sown in the Edmonton district on
the 1,000 acres which the company
has leased for the growing of veget-
ables required for the Edmonton fac-
tory. These will include peas, beans,
spinach and beets, and an attempt will
be made to grow pumpkins in com-
mercial quantities for canning. Offi-
cials of the company express them-
selves as being well satisfied with the
success of last season's operations in
Alberta, and propose to extend their
program during 1929 and subsequent
seasons.

NEW BULLETIN ON WEED PROBLEM ISSUED

Alberta's Weed Problem, Bulletin
No. 3, has recently been issued by the
Field Corps branch of the Alberta De-
partment of Agriculture and is now
available for distribution through the
office of W. J. Stephen, Field Corps
Commissioner. This publication
brings up to date much valuable in-
formation dealing with the control and
eradication of noxious weeds in the
province and will be read with at-
tention by farmers and others inter-
ested in this problem.

FLIES OR BABIES, WHICH?

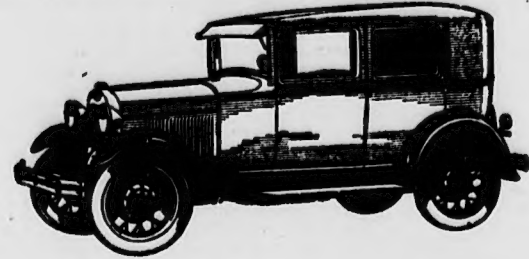

The above arresting title to a brief
but very telling little pamphlet issued
by the Metropolitan Life Insurance Co.
gives a very real meaning to the
"Clean Up" week which is being urged
on all communities at this season.
Filth and garbage of all kinds ac-
cumulate during the winter months.
With the coming of the warm days the
house fly appears. It is born in filth,
lives in filth and when not busy on
butter, milk, preserves or the baby's
bottles, is feeding in filth.

It is estimated that the flies are re-
sponsible for more deaths than any
single known disease. Babies are its
particular prey since the infantile dis-
ease are carried largely by the pest.
Get rid of it by cleaning up all filth
and garbage. Make a habit of burn-
ing all refuse. Give it no chance to
breed. Screen doors and windows at
the first hint of warm weather. Two
flies at the beginning of the season
will be responsible if allowed to live,
for millions of other flies, they breed
so rapidly. So clean up, burn up and
screen doors and windows. Is it to
be flies or babies? The choice is
yours.

For literature on the summer care
of babies send to the Canadian Red
Cross Society, 497 Civic Block, Ed-
monton, Alta.

THE FORDOR SEDAN

brings you the Luxury of a
Custom Built Car

THE Fordor Sedan was de-
signed for comfort. You'll like
it because of its wide seat space,
ample leg room, deep cushions,
and the generous freedom be-
tween front and rear seats.
Windows are unusually large,
clear vision is insured by nar-
row pillars and substantial door

construction.

Hardware is full nickeled. Up-
holstery and appointments are of
a quiet, rich type unusual in a
low-price car.

Bring the family to see the For-
dor Sedan and let us take them
for a ride. You will learn a lot
about comfort, speed and safety
in a thirty minute drive.

A word from the publisher about advertising

The products you see consistently advertised in this paper
are worthy of your confidence.
It takes two things to make a consistent advertiser. One
is a strong conviction that he has a product that will hold
its place in public favor despite competition. The other is
actual proof of that. . . . the increasing popularity of his
product.

If his product will not stand the test of comparison he
would simply be throwing his advertising investment
away. If the buying public rejects his product after it
has been offered in advertising he has thrown his adver-
tising investment away. . .

That's why the manufacturer who advertises his mer-
chandise consistently is very sure of his quality. . . and
why you may be sure of it, too.

Read the advertising here in your news-
paper—it will guide you to the buying of
worthy merchandise

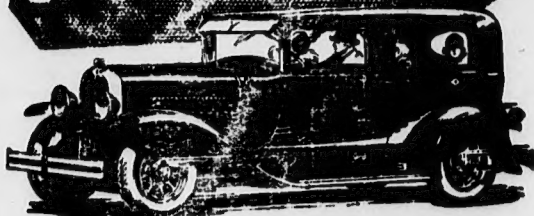

The Gateway of C. P. R. Connections to New York

At the heart of New York, at 42nd Street is the New York Central Station where Canadian Pacific trains from Montreal and Toronto arrive and depart. The above is a photo of the New York Central building which is a part of the station building and is one of the outstanding buildings in a city of wonderful buildings. Standing almost forty stories high at the head of Park Avenue, it rises well above the high buildings surrounding it. It is of gold relieved by brilliant reds and greens and when lit by a battery of flood-lights at night it is one of the beauties of New York and can be seen for many miles around.

TAXES AND MEN

A man will go out and buy a half a dozen cigars at ten cents each, lose one of them and break two in his pocket and laugh it off. But let his taxes be increased sixty cents and he loses nine hours sleep and does enough grousing to postpone a war. Taxes are regarded as life's worst calamity.

It is not peculiar to this day and generation either. There were certain forms of taxes when man was in his primitive state little removed from the monkey. In those times and hundreds of years later it was a pleasure and a privilege to carve up the tax collector into small chunks when opportunity arose. We have become a little more refined in our protests, but still the complaint goes up loud and long.

Many a man pays out enough for gasoline for pleasure motoring in six months to pay his taxes for a year and never thinks about it. Others smoke enough in a month to pay their taxes but never worry about it. But let a town embark on expenditure that might cost these same men \$3 or \$4.50 a year in taxes and the roar is heard throughout the length and breadth of the whole country.

Taxes constitute a universal complaint from great nations to town lot holders, from German reparations to public improvement taxes on a sidewalk four feet wide and fifteen long. The howl from the sidewalk tax payers is similar in every respect to the international howl.

A league of tax complainers would include each country in the world and every individual. It is the only common ground upon which everybody in the world could stand because it has been to all nationalities and it is translated into all tongues that nothing is surer than death or taxes.

ECHOES OF GLEICHEN TWENTY YEARS AGO

Taken from the Call in 1909

The Gleichen Trading Co. have completed all arrangements to start the construction of five-store buildings, starting from the company's present store on Crowfoot street west to the Gleichen Hotel, a distance of 75 feet. The new block will have a depth of 50 feet and will be one story high.

A. J. Maisey will build a brick residence on his Sixth street property next month.

Ralph Notter left for Ontario last week to remain. His friends all wish him success in his new undertakings.

It is now up to some joshier in the next town to say Gleichen has a plenty of natural gas without drilling for it.

Arthur Daw started for Ontario last Thursday to bring back his wife to Gleichen, when they will occupy their new residence on Sixth avenue.

J. A. Markle, inspector of Indian Agencies, has been in town for several days, and has purchased several fine stallions from John Clark, Jr., which Farm Instructor Brereton will take to the Battleford Agency.

While playing polo one evening last week, A. Bruce was thrown violently to the ground and sustained a broken shoulder blade by his horse stepping in a gopher hole. His injuries were attended by Dr. Rose and were quite painful for a couple days, but he is now mending nicely.

Clareholm Review: Wm. Quayle has sold out his cattle to the number of about 400 to E. Douglas Hardwick, of Queenstown, who will take them out east. Such a large number of cattle has not been brought into town at once for a long time.

Tuesday night a snowstorm set in and about four inches of the beautiful covered the ground. Then the wind blew quite hard all day yesterday, blowing the snow in every direction and forming some pretty good drifts, but the weather was not cold.

J. A. McDonald, the popular C.P.R. telegraph operator, left on Monday for his home in Chatsworth, Ontario, for two months well deserved holidays which he may possibly lengthen out considerably.

On Thursday evening of last week J. Rousche received some very painful injuries by his team running away and the wagon wheel passing over him.

Even the weakest among us have some power.

The poorhouse in Doncaster, Eng., received \$5 in payment of a loan made to an inmate 65 years ago.

In Early Britain---

We have traced the art of brewing from the Greeks of 500 B.C. up to Ancient Rome. The Roman soldiers introduced it to the early Britons. Previous to their invasion the usual drinks of the early Britons were water, milk and mead (an intoxicating drink made with honey). Beer being so suitable to the climate, and so easily made by an agricultural people with plenty of corn, it was gladly welcomed and soon became the national beverage, being the popular drink even to this day.

Today Malt Beverages
BEER — ALE — STOUT
are considered Health
Drinks.

Where BEER has once been introduced, it
has generally become the national
beverage. . . .

YUHAUTOREADTHIS!

He had choked her—
She was dead—there could be no doubt about that. He had listened to her dying gasp.
Now she was cold—cold as the hand of death.

Yet in his anger he was not convinced. Furiously he kicked her. To his amazement she gasped, sputtered and began to hum softly.
"Just a little patience is all it takes, John," remarked his wife from the rear seat.

Hotel Longfellow Built

This hotel, the New Pines at Digby, N.S., was built by Longfellow. Not, however, that he saw it, thought about it or even dreamed or imagined it. What he did do towards it was render immortal the Land of Evangeline, the beautiful Annapolis Valley of which Digby is the gateway, and so create a tourist lure.

The New Pines is being built by the Dominion Atlantic Railway to further aid in the development of tourist traffic in the Maritime

and, with the exception of the outdoor swimming pool, the lines for which were borrowed from those at Banff and Lake Louise, it is a handsome building of early English type of architecture. The opening of the Pines will shortly precede a three day festival at Annapolis Royal in commemoration of the three-hundredth anniversary of the arrival there of Sir William Alexander, Scottish colonist under the charter of New Scotland granted by King James I.

Disappointment

At a small station in Alberta the daily passenger train was getting ready to leave.

"All right back there? bawled the conductor.

"Hol' on; Hol' on!" shrilled a feminine voice from inside the waiting room, "Jess wait till I gets my clothes on."

And, then, as the occupants of the train craned their necks expectantly, she appeared with a basketful of laundry.

If you cannot have what you like, try to like what you have.

Calgary lady, interviewing cook: "Do you understand French cooking? My husband is very fond of little dainty dishes."

Cook: "Oh, yes, ma'am. I know all them furrin' dishes."

Lady, delight: "Really! What can you do?"

"Well, ma'am, I can cook French

beans, German Sausages, Brussels sprouts, Jerusalem artichokes, Spanish onions, and Dutch cheese."

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

WORLD HAPPENINGS BRIEFLY TOLD

The government proposes to create a national park in Manitoba, it will be in the Riding Mountains and will embrace 1,000,000 acres.

After half a century as sergeant-at-arms in the Manitoba legislature, John McDougall, 83, died April 30, at his home at Lockport, Man.

The King ordered conferred on General Bramwell Booth, deposed commander-in-chief of the Salvation Army, the Order of Companion of Honor.

Where the Ashburton-Webster treaty was signed eighty-seven years ago, a plaque was unveiled recently by Kiwanis International as a memorial to the friendship between Canada and the United States.

Iyemasa Tokugawa, former councillor of the Japanese embassy at London, and grandson of the last of the Tokugawa shoguns, has been appointed to the newly created post of minister of the Japanese Empire in Canada.

A shipment of \$8,000,000 of gold from Germany arrived recently at New York on the liner "Hamburg." Since March, when the present movement of gold started, \$30,923,000 of the metal has been sent from Berlin to New York.

Professor J. B. Sackville, of the University of Alberta, Edmonton, is the newly chosen president of the Canadian Society of Technical Agriculturists. The officers for 1929-30 take over their duties at the annual convention to be held in Winnipeg in June.

Influence Was For Good

Late Marshal Foch Was Exceptional Man In Every Way

The influence and charm of Marshal Foch have been illustrated in many ways. During a crisis in the war, M. Clemenceau, then premier, went to the front to see the distinguished soldier. When the "Tiger" reached headquarters he was told by a staff officer that the marshal was at mass, but, if it was a matter of special importance, the marshal might be disturbed. "No, no," was the response of M. Clemenceau. "Don't disturb him. It has carried him through very well so far." Early in 1918, during a very grave period, the Methodist council in London, passed a resolution to send a telegram to Marshal Foch with the words, "We pray for you." The telegram was sent, but no reply was received. After the Armistice, Foch, in conversation with an English statesman, confided to him that one of the things which had moved him most in the war was the receipt of a remarkable telegram stating that the Methodists of England were praying for him.—London Morning Post.

A Young Linguist

George Grando, 4, of Vader, Wash., is a linguist of ability. He speaks English or Croatian with equal facility. He was born in America, but his parents came from Dalmatia. He reads the letters of the alphabet in both English and Croatian, can count to 20 in both languages, and converses freely.

Many Varieties Of Bananas

Although most of us know only two varieties of bananas by sight, there are numerous others, the Philippine Islands claiming fifty-seven, Malay, thirteen, Spain, ten, and Burma, eight.

"Isn't the sea lovely, sir?"
"Rubbish. Take the water away, and what remains? Nothing!"—Nagels Lustige Welt, Berlin.

W. M. U. 1784

Paint Pointers

In finishing wood it is important that the groundwork be sandpapered and thoroughly dusted off before the next coat is applied. Dusting is indispensable to good workmanship, particularly in the case of woodwork, furniture and automobiles, where a high gloss is the aim of the finisher, and this holds good whether the work is to be finished in varnish, enamel, color varnish, or even in a high gloss oil paint. Without the duster, even when other conditions are perfect, work will present a blotched, dirty looking, and seedy appearance, and the higher the gloss in the finishing product, the more this condition will be reflected. "Dusting off" does not mean that the dust is to be scattered from any given surface with a rag or anything that comes handy. It simply means that a soft bristle, painter's duster is to be used and that the dust is not only to be removed from the surface under treatment, but also from everything in close proximity to the scene of operations.

In the application of paint to ironwork, the first thing to be done is to get the surface absolutely free from rust. A mere scratch with a knife will seldom be sufficient; a good scrubbing with a wire scratch brush is more effective. The success of varnishing does not depend altogether on the quality of the varnish itself. The conditions necessary to ensure satisfactory work are numerous, but the most important are, cleanliness of brushes and surroundings, and a warm temperature.

The first coat on new plaster should be very thin in order that the paint may penetrate and harden the surface so as to form a key for the following coat. Abundance of time should be allowed between each coat.

Split, curled up shingles, even when re-stained or painted, represent a depreciation far in excess of the cost of periodical painting.

The easiest and quickest way to stir up a can of paint is to pour off the liquid from the top, stir up the pigment in the bottom of the can with a fairly wide paddle, then pour back the liquid gradually, stirring well — with a circular and upward motion of the paddle. For perfect mixing, complete the operation by pouring the paint back and forth, several times, from one container into another.

It is always best to bed sash, because it very seldom happens that glass is perfectly level on its flat side, hence does not lie flat against the wood. The bedding putty should be soft enough to run freely from under the thumb.

Whenever possible, shingles, for at least three-quarters of their length, should be dipped in a vat of stain and after they are laid a finishing coat applied with a brush.

Duster bristles should be washed with soap and water before being used on white woodwork, otherwise they are apt to discolor the purity of the ground.

Chamois skins for finishing work should never be thrown on the floor nor allowed to come in contact with gritty substances.

Raw linseed oil and turpentine, mixed, is an infinitely better medium than water for keeping brushes soft.

Spots of flat wall paint from ceilings or walls should never be allowed to dry on the woodwork. They should be wiped off at the end of the morning's work, and again at the end of the day, with a rag soaked in turpentine. A little labor expended in this way will save hours of hard work in the finishing of the floors and woodwork.

The time allowed for drying between coats depends on conditions of temperature, ventilation and surface. This does not mean that a paint manufacturer who declares on his label that forty-eight hours should elapse between coats is merely guessing. Not at all! The product has undoubtedly been tested and manufactured to act on this time schedule under fair conditions, but unfortunately, it is likely to be applied under conditions that are decidedly unfair — such as a cold room, no ventilation, greasy or smoky surface — and in such cases the scheduled time of forty-eight hours ceases to possess any value as a reliable guide. As a matter of fact the correct time lapse might be four days — or a week! When the preceding coat is so dry that there is absolutely no suspicion

of "tackiness" under a firm pressure of the fingers or hand, the second may be safely applied.

Painting New Wooden Buildings

A satisfactory priming coat is prepared by mixing five gallons of pure raw linseed oil with each hundred pounds of white lead, together with one-half gallon of turpentine and one quart of turpentine dryer. Many painters prefer to use for the priming coat some of the ready mixed paint which is selected for the painting of the house. Where this is done, a lighter shade than that which is to be used for a finishing coat, either for trim or body, should be chosen. To each gallon of the paint add one gallon of pure raw linseed oil.

One gallon of paint reduced in this manner, making two gallons or primer, will cover from 800 to 1,000 feet of surface, depending upon the absorbent character of the wood.

The primer for tin or galvanized gutters and pipes should be somewhat heavier. One-half the above quantity of pure linseed oil to a gallon of paint is sufficient. A special galvanized iron primer is still better, for the reason that ordinary paint will not properly cling to galvanized iron owing to certain processes used in galvanizing.

Do not use a cheap priming coat. The employment of cheap ochres mixed with a poor grade of linseed oil for the priming coat will invariably lead to trouble. Such a primer will not stick to the wood and even though the succeeding coats are of good quality, they are likely to blister and crack off, thus bringing the good name of the finishing paint unjustly into disrepute. A poor primer is among the costliest of investments.

Putty is to be used as filler for cracks and nail holes, after the priming coat has dried. A small amount of white lead mixed with putty for extra fine work makes a cement that wears like iron. It is especially useful around skylights where conditions are particularly exacting.

New buildings should always be given three coats, including the priming coat already described. It fewer coats are used there is always a temptation to make the priming coat too thick, which is most undesirable. A thick priming coat has too little penetration into the pores of the wood and possesses very little elasticity. It is almost sure to crack and peel off.

The second coat of paint is applied after the priming coat has thoroughly dried. It is prepared by adding to each gallon of paint approximately two or three pints of pure raw linseed oil and a half-pint of turpentine. The actual amount of reducer is determined by the shade of the paint, more reducer being possible for dark colors than for light. Turpentine is used in this coat for the reason that it reduces the hard gloss of the surface and thus makes a base to which the third, or finishing coat, will stick.

It is well to remember, also, that the second coat should be "brushed out" well in order to obtain that elasticity in both of the under-coats which makes for permanency.

The third or final coat of paint should be put on just as it comes from the can. Like each of the other coats, it should be "put on thick and brushed out thin," as a time-honored painter's maxim expresses it, in order to secure the tough elastic covering which is bound firmly to the wood and which endures for years.

Repainting Wooden Buildings

It is always good policy to re-paint a building before the previous coat has fallen into a bad state. If the work is done while the old coat is in good condition and the same value of paint is used ("value" referring not to color but to the paint's degree of lightness or darkness), one coat is usually sufficient when a good house paint is employed.

If, however, the old coat has been permitted to fall into a state of disrepair, it will be necessary, in order to put the surface into good condition, to use two and sometimes even three coats of paint.

If, owing to the use of a cheap ochre primer, or because the previous painting was applied on damp wood, or because of any other malpractice, the old coat has become hopelessly blistered and is peeling, the only safe course is to remove it entirely. If this is not done, the new coat (no matter how good your materials may be, and no matter how excellently you may have done the work), will be lifted off by the continued peeling and cracking of the old under-coat.

The best way to remove paint from large surfaces is to burn it off with a blow torch. This method consists in softening the paint with intense heat, generated by the torch, and scraping it off while still hot with a metal scraper. It is advisable to employ an experienced man for this work.

After the old coat has been entirely removed and the surface of the wood sand-papered and dusted off in the usual way, the building should be painted in the same manner as directed for new wooden buildings.

Usually an old coat which is in fair condition will merely require treatment with a coarse wire brush and scraper in order to remove the few loose particles adhering to the surface. It should then be dusted off and given two coats of paint.

The first coat is prepared in the following manner. If the surface seems unusually porous, a half-gallon of pure raw linseed oil and a pint of turpentine should be added to each gallon of paint. If the surface is hard and smooth, omit the oil but add a pint of turpentine to a gallon of paint.

The second coat of paint should be applied as it comes from the can.

Both these coats should be applied with the same care as is given to a new job and the general directions for painting new wooden buildings should be re-read and followed.

Staining Shingle Roofs

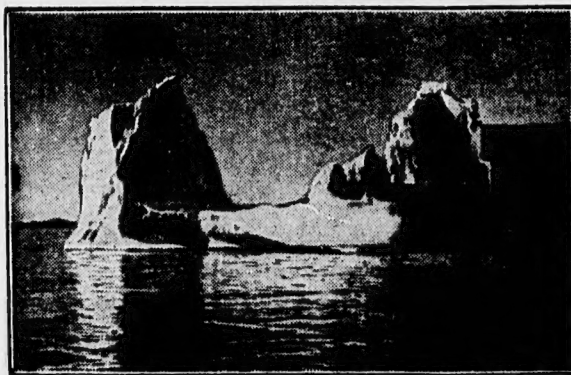

Use a good shingle stain.

Before beginning the work, see that the shingles are dry and clean.

As a matter of economy it is better to dip shingles in bulk before laying them. Dip them in and out as quickly as possible and wipe them off by rubbing across a stick covered with burlap. Then allow them to drain off in a drip trough. They should be stained for only about two-thirds of their length. Stain the exposed ends only.

Paint is best for old, weather-beaten shingles, blackened by age and exposure. The priming coat should be prepared as directed for house painting and should be brushed out well with careful attention to the ends of the shingles. The second and finishing coat should be applied as it comes from the can.

MENACE TO NAVIGATION

The annual menace of floating icebergs is being met as usual with the dispatch of watchful little coast guard cutters. These patrol the sea and when a berg is located flash searchlights and send out radio warnings. The icebergs are huge, for only one-third is visible above the waves.

Choosing Upholstery and Drapery Fabrics

There is a far wider range of choice in upholstery materials than is generally utilized. Selections of serviceable and attractive materials are not limited to the tapestries, velours and velvets in which stock pieces of overstuffed furniture are usually found in the shops.

The following fabrics are suggested for upholstery purposes:

Wool Rep: This is a material which comes in 50-inch width in a selection of staple colors. It is serviceable and inexpensive.

Corduroy: Upholstery corduroy is material that should be used far more widely than it is at present for upholstery purposes. It is attractive, inexpensive and durable.

Cretonnes, Printed Linens and Printed Mohairs: Cretonnes, printed linens and printed mohairs are highly decorative upholstery materials.

Monks Cloth and Denim: These are cotton materials which are attractive and give good service. They are excellent for recovering old pieces of overstuffed furniture where expense is an item.

Cretonnes are universally popular for draperies, and not without reason. They are light, cleanly and colorful and can be purchased in a very wide selection of designs, colorings and prices. In living rooms and dining rooms, stronger or richer colorings and bolder or more formal designs are preferable to the more delicate floral patterns suitable for bedrooms.

Toile de Jouy patterns of classic restraint and both bold and restrained floral patterns, provide the characteristic decorative note for Queen Anne furniture.

Crude color in cretonne is to be avoided, but the other extreme of weak or characterless color must be guarded against. Conventionalized designs in striking decorative effects are less hackneyed than the regulation floral patterns. Naturalistic flowers in an all-over design are not as distinctive as fanciful floral types on a broken background.

Printed linens are usually hand blocked and are softer in outline and color. The hand printing gives a rich texture to the fabric. They are more expensive than domestic cretonnes, but pay in the end, as they retain their crispness and color. Linen is a more interesting and distinctive fabric than cotton.

Gingham, chambray and sateen provide effective window drapes for country houses and children's rooms. A border of contrasting color adds to their decorative effect.

Plain silks are usually selected for draperies when there is already sufficient design in the room. They are the best selection for a room with a figured wall paper of pronounced pattern. They are also a good selection in a room where the floor covering or upholstery materials have a conspicuous design. Thin silks of the pounce, china silk or gauze variety are particularly pleasing in the daytime when unlined.

Taffeta is delightful in bedrooms with enameled furniture. It comes in a wide range of exquisite pastel colorings and effective stripes.

Bedrooms call for a type of drapery fabric which is different from the family rooms of the house.

Dotted swiss, organdy, voile and cross-barred batiste are most attractive bedroom fabrics. They can be used for both bedspread and window curtains, and if selected in a pastel color, rather than white or cream, no additional window drapery is necessary. Tinted gauze glass curtains add a colorful note to a bedroom. Wool embroidery or applique provides decorative interest for plain materials.

Tangled Titles

Fletcher: "How did the jury come out in that Army Post case?"
Barker: "They disagreed on the question of titles."

Fletcher: "What do you mean?"
Barker: "They said they couldn't hold a Colonel in a Major crime arising from a General riot occasioned by a Private quarrel!"

Kindly Wife: "Still I don't think you should be too discouraged about your driving, George. Look at all the telegraph poles you passed safely before you hit this one."

London has more than 20,000 bobbies—English policemen.

Floor Coverings

Next to the walls and ceiling, the floor presents the largest area in the room, and consequently its covering should be well thought out and carefully selected.

The floor, as well as the ceiling, is a plane which holds the four walls of the room together. While the walls form the background for furnishings, the floor is the foundation. A good foundation is always essential to any well-designed decorative plan.

Linoleum floors are attractive, resilient, shock-absorbing, durable, warm in winter and cool in summer. Waxing linoleum gives it a softer, smoother texture and preserves it indefinitely.

For the average room, a rug with a plain ground and a neat border, or neat all-over pattern of floor covering, is more desirable than one with a decided pattern.

Large and bold patterns have a decided tendency to make the room look smaller. The patterns are apt to jump and as the ideal floor covering furnishes the foundation for furnishings it must be made to keep its place on the floor. When there is a great deal of furniture, a boldly figured floor covering gives a confused appearance to the room and destroys its restful, harmonious appearance.

Boldly patterned rugs usually come in strong colorings, and this also makes them exceedingly difficult to fit into a soft, harmonious color scheme.

Figured floor coverings, however, have their place. In rooms which are sparsely furnished or where the furniture is of a light and simple type, they add to the "furnished" appearance of the room. That is, they take away bareness. In large rooms which are sparsely furnished, figured rugs are particularly advantageous.

In dining rooms, it is usually preferable to have a figured floor covering, as it does not show soil or stain so quickly as plain floor coverings. In bedrooms where the furniture is of a light type, a figured floor covering adds to the comfortable appearance of the room. In sleeping porches, enclosed porches or breakfast rooms, where the furniture is not usually plentiful, either tile effects or a bold figured floor covering adds greatly to the finished appearance of the room.

It is a wise plan when a highly figured floor covering is used to use hangings or upholstery material in a plain color or in a neat and unobtrusive all-over pattern. On the other hand, if the hangings or upholstery is figured, plain floor coverings are best. Too many figured patterns in a room create the feeling of motion and the effect produced lacks restfulness. Too many plain surfaces, on the other hand, tend to make a room look bare and uninteresting. Some figured material should be used in every room, but it should be balanced with a proportionate quantity of plain material or surfaces without design.

In selecting a figured pattern, the colorings must be considered first. For general use, strong or vivid colors should never be selected. Small all-over patterns are, in most cases, preferable to large sprawling ones. The tone of the floor covering should always be deeper than that of the walls or furniture, as the ground we walk on is always darker than the sky or the landscape. Light-colored floor coverings are exceedingly difficult to fit into a harmonious scheme.

Irish Magistrate: "The defendant swears he was perfectly sober."
Policeman: "He was absolutely intoxicated. If he had been perfectly sober he would have known he was drunk and not made a disturbance."

Preserving And Laying Linoleum

The ideal method of laying linoleum is to cement it over deadening felt paper, which should first be pasted to the floor with any standard make of linoleum paste. This overcomes bulging and stretching, or opening up of seams and cracks along the edges. It also prevents water from getting underneath the linoleum and in that way prolongs the life of the flooring.

Linoleum laid in this manner becomes a solid, permanent, elastic floor. It cannot bulge or stretch. The felt paper foundation absorbs all expansion or contraction that may take place in the wood floor and makes the linoleum more durable. It also allows the linoleum to be removed without difficulty or damage should the necessity arise.

The most approved manner of treating linoleum has been found to be waxing. The wax should be carefully rubbed on and the floor polished like hardwood. An occasional treatment of this kind will keep the linoleum in an immaculate condition. A damp cloth removes all soil from the waxed linoleum and it will be found that scrubbing is entirely unnecessary.

In case there should be obstinate marks of soil on waxed linoleum, they can be removed with a pad of fine steel wool without scratching or damaging the linoleum itself.

Varnishing is best for printed linoleum, as it brightens and preserves the original pattern and makes the linoleum easier to clean. A coat of good varnish or white shellac will also preserve cork carpet.

Pedigreed Hatching Eggs

A record shipment of pedigreed White Leghorn hatching eggs was made recently by the Poultry Breeders' Association of British Columbia to a hatchery at Petaluma, California. The shipment consisted of 36,000 eggs valued at \$5,000.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XVIII.—Continued

The rush of wings sounded high in the air as wild ducks passed in swift flight on their yearly pilgrimage to the south. Occasionally a flock would lower in gradually narrowing circles to land with a splash in the restful waters of the lake, then to stretch tired wings, the while bobbing their heads and quacking contentedly. Flocks of geese passed in wedge-shaped formation, their honking coming faintly from a dizzy height. A flock of Arctic swans, skimming so low that the crisp rustle of their wings could be heard, landed in the centre of the lake with a great commotion. There with their beautiful necks proudly arched they floated like white ghosts throughout the night. The red and yellow leaves, like gaudy curtains draped the deciduous trees. The wild crab-apple and high-bush cranberry hung frozen on the naked branches. The sun was surrounded by a ring and shone weakly through a misty haze. The unmistakable breath of the north wind was in the air.

Old John took his traps down from the loft and oiled them. A patch was found needed to a worn moccasin, and new laces were inserted in his snowshoes. "Winter's com'n', ol' timer, and we're going to have a heavy fall of snow," he mused to himself. For two days Nature gave warning, then on the second night the storm came.

A roaring wind came howling from the north, lashing the waters of the lake to foam, tearing at Donald's cabin with the strength of invisible giant hands, and howling through the forest with shrieking walls. Gust came upon gust with increasing strength, and in the short lulls could be heard the swish of the sleety snow against the windows.

The big trees creaked as they swayed in the gale, and with a loud groan, as if in mortal pain, a huge forest monarch, as its roots gave way, fell crushing down the smaller

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—
Evelyn Bourque, 132 Alma Street, Moncton, New Brunswick.

Lydia E. Pinkham's
Vegetable Compound

W. N. U. 1784

She would never be content with the bad air and the cramped conventions of cities. He suddenly remembered the words she had used that day by the stream near her nest in the cedars. He seemed to hear her sweet, hesitating voice with its pleasant English accent.

"And," she had said, "six months out of every year I'd come right here and live in these mountains."

"She'll come back," he said aloud. The thought cheered him. "She'll come back," he repeated to Andy that night.

"I hope so, Donnie."

A week later, Robert Rennie, accompanied by his daughter, arrived at Summit Lake. The owner was in high spirits. "I am pleased with the excellent work you are doing here," he said, as he placed a hand in friendly fashion on Donald's arm. "The mill is a success—a huge success—and I know who deserves the greater share of the credit!" He smiled up at Donald. "Next week" he went on, "an event of importance to the lumber industry takes place. The Government is to entertain a visit that I was proud when the chief forester called at my office to party of Eastern lumbermen. I will tell me that this mill had been selected as the most modern and efficient in the Province, and requested permission to bring the Government's guests here."

"They are to stay here a few days, but you will not be inconvenienced, as the train will be equipped with dining and sleeping-cars, loaned for the occasion by the C.P.R. I will come with them, but I am leaving it to you to arrange for their entertainment and to see that everything is in tip-top shape for their arrival."

As Robert Rennie was leaving the next morning he turned to Donald. "By the way," he said casually, "I have decided to add a yearly bonus to your salary, based on the profits of this mill. I have made it retroactive from the time you took charge." Before Donald had time to express his thanks his employer swung aboard the train.

Expressing a desire to be at the lake on the arrival of the excursion, Janet remained.

On the day set for the visit of the Eastern capitalists the sun rose in radiant promise of a typical June day. The leaves were now fully matured, and the willows and maples rustled under the soft, warm winds. All the valley was clothed in a verdant, quivering, gently pulsating life.

The long train drew slowly into the depot. Its occupants poured out until the small platform was filled to overflowing. Robert Rennie, accompanied by a slender man dressed in a tweed suit and cap, pushed his way through the crowd to Donald's side. Donald greeted his employer, then glanced casually at Mr. Rennie's companion. His eyes widened. "Mr. Wainwright!" he gasped.

Wainwright laughed happily as he wrung Donald's hand.

"Is—Is Con—Miss Wainwright with you?" stuttered Donald.

Then he saw her.

(To Be Continued.)

Scientist Makes New Discovery

Says Milk Treated By Wireless Waves Keeps Sweet For Weeks

An Austrian scientist claims to have discovered a method by which milk treated by wireless waves of short length can be kept sweet for three or four weeks. The new "wireless milk" is produced by passing an intense beam of short waves through the liquid. This is said to kill all germs which cause milk to turn. The milk itself is not heated by this treatment, and does not acquire a "cooked" taste.

High Price For Canadian Lambs

A flock of 820 winter fed lambs shipped to an eastern market recently by Albert Green, farmer at Taber, Alberta, were sold for a total of \$12,000, or 17 cents per pound. Other shipments of Western Canadian lambs are to be made to markets in the East where, it is reported, they are in demand.

A Costly Gift

The wedding present of the City of Stockholm to Princess Martha of Sweden when she married Crown Prince Olaf, of Norway, was a diamond tiara set with 956 stones.

Aching Feet

Swollen and sore from a day's strenuous work can be relieved by Minard's. Bathe in warm water solution.

His mind went back to his first meeting with Connie, then on through the many thrilling episodes of the summer. She belonged to high mountains, to deep forest glades, to companionship with the birds, flowers and trees of God's wild outdoors.

Task For the Soviets

Suppressing Holy Men Of Russia Would Not Be Easy

If the Soviet Government really means to try to suppress the "holy men" who wander about in Russia it will be up against as hard a task as it has encountered yet, writes "Looker-on" in the London Daily Chronicle. These local saints or "elders," as they are called, have great influence, not only on such highly-placed people as believed in Rasputin, but on the mass of peasants. The Russian villages are forcing-beds for superstition, and the "staretzi" make the most of that fact. Some of them are genuine, too, and preach with the fervor of Jewish minor prophets.

Recipes For This Week

(By Betty Barclay)

STUFFED LAMB CHOPS

10 chops.
1 tablespoon butter.
1 tablespoon chopped onion.
1/2 cup chopped mushrooms.
1 teaspoon salt.
Pinch of pepper.
1 tablespoon flour.
2 tablespoons stock.

Trim the chops and cut very thick with sharp knife. Split each chop being careful not to separate the meat from the bone. Put butter in a pan and add the onion, cook slowly for five minutes, then add the mushrooms, salt and pepper and cook five minutes more. Add the flour and stock and cook a few minutes more. Stuff each chop with this mixture before it cooks. Press each tightly together and broil. (If mushrooms are unavailable, bread dressing may be used, using a greater quantity of stock.)

EGYPTIAN DELIGHT SALAD

Flake one can salmon, and mix with one cup diced celery. Mix thoroughly with boiled salad dressing. Place lettuce leaves on a chop plate so that they reach out to the edge of the plate. In the centre heap the salmon mixture, pyramid fashion, press lightly into the sides one dozen stuffed olives, having the red on the outside. Arrange around the edge two or three tomatoes, sliced, with a ball of cottage cheese (moistened with salad dressing) in centre of each. Between each slice of tomato place a small radish with its green stem upwards.

Everything In a Name

People Of Importance Usually Get What They Want

Recognition of senior officers when dressed in plain clothes is a matter which frequently gives trouble to the rank and file in the services. The same difficulty arises in the Metropolitan police, where a good story is told of Lord Byng visiting a suburban station shortly after his appointment. The door was guarded by a burly officer. "Can I come in?" asked the chief commissioner. "I don't think so," replied the officer. "The inspector is out." "Well, can you send for him?" "Yes, if its important. What name shall I give?" "Byng." The alacrity that followed dispelled any doubt about the query "What's in a name?"

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

Homestead Entries

Homestead filings for the two first months of the year numbered 1,416, as compared with 1,036 for the same two months of 1928. Alberta's entries amounted to 702 as against 502 in January and February of 1928; Saskatchewan's were 595 against 430; Manitoba's 78 against 74, and British Columbia's 41 against 30.

Vancouver Grain Shipments

The 1927-28 record of 80,254,688 bushels of grain shipped from the Port of Vancouver has already been passed, with over three months still to go, to round out the present year.

Horace—What is a bachelor, Daddy?

His Father—A bachelor, my boy, is a man who looks before he leaps — and then doesn't leap!

Potash In British Columbia

Large Scale Fertilizer Industry To Supply The Needs Of Prairie Farmers

"Substantial fortunes are awaiting the prospectors who unearth some of the potash believed to be stored away in the mountains of British Columbia," said George H. Kilburn, of the Consolidated Mining and Smelting Corporation, which is working out a large-scale fertilizer industry at Trail to supply the needs of the Prairie Provinces. Mr. Kilburn mentioned that the company is making free analysis of potash specimens submitted so as to assist prospectors.

GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood Ailments

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times. They are a mild but thorough laxative which by regulating the bowels and stomach banish colds and simple fevers; correct constipation and indigestion; relieve colic and diarrhoea and make the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, Westmeath, Ont., who writes:—"I have four children and whenever any of them are ill I always use Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like your little booklet 'Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Saskatchewan Famous For Clays

Saskatchewan has a greater variety of clays, in larger quantities and of the higher grades, than any other Canadian province, and will, without doubt, become the centre of a very important ceramic industry. The clays of Saskatchewan have been the subject of special investigations by the Department of Mines, Ottawa.

There are more than 1,024,000 persons by the name of Johnson in the United States.

The average horn will blow 150,000 times before wearing out.

Giant Passenger Plane

Capable Of Carrying 83 Passengers Across the Atlantic

Anthony Fokker airplane manufacturer, announces in New York that within six weeks his factory will complete construction of a giant passenger plane, capable of carrying 83 persons and powered with four 600 horse power motors, which, he said, would be able to cross the Atlantic without difficulty.

Although he predicted regular trans-Atlantic passenger service by airplane within the next five years, Fokker said aircraft would never become a serious competitor of steamship lines.

Little Helms For This Week

"Consider the lilies of the field."—Matthew vi. 28.

Consider then the lilies,
O heart of mine, today;
They neither toil nor spin to win
Their beautiful array;
I would that thou couldst lead a life
So fearless, sweet as they.

—Margaret E. Sangster.

There is a wise meaning and a gracious design in every tint of the lily's adornment and every curve of its grace. Its symmetry is a type and proof of the divine justice. Its life is co-ordinated, and keeps time with the sublime motions of the heavens; and its structure and uses are full of the profound teachings of the unsearchable God. And if God thus care for an individual flower which today is, and tomorrow is cast into the oven, how much more will He care for an individual human being whom He has made in His own image, and upon whose life He has made such momentous issues to depend.—Hugh MacMillan.

The Man: "Whether marriage is a failure or not, I certainly think that some are more fortunate than others in what they get."

His Wife: "Yes, I quite agree. For instance, you got me, but I only got you!"

Minard's Liniment for cuts and bruises.

The Royal Northwest Mounted Police consists of only a few hundred men, yet they patrol and maintain order in a territory of 1,200,000 square miles, half of which is inside the Arctic circle.

Saving Seven Seconds

Many Motorists In Attempting It Have Lost Their Lives

It has been established that seven seconds is the average length of time it takes a fast railroad train to get by a level crossing. That isn't a long period of time to the living, but it has meant eternity to many thousands of motorists who couldn't spare the seven seconds. They risked their lives to save them. Most everybody, in motoring across the country, has on two or three occasions hurried to cross a railroad track ahead of a train, so that they wouldn't have to wait. Some others valued the seven seconds so highly they paid with their lives for them.

A bachelor is a man that no widow has wanted to marry.

Cuticura Heals Face Disfigured With Itchy Pimples

"I had pimples all over my face. They were hard, sore and red and some of them were large and others small. Some of them festered and scaled over, and itched and burned causing me to scratch. Scratching caused eruptions and the irritation prevented me from sleeping. They disfigured my face for many weeks. I tried different remedies without any results. I began using Cuticura Soap and Ointment and it was only a few weeks before my face was completely healed, after using two cakes of Cuticura Soap and one box of Cuticura Ointment." (Signed) Miss Harriet Hamilton, Box 772, Yarmouth, N. S.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, sweet skin, soft, smooth hands and a healthy scalp with good hair.

Soap 25c. Ointment 25c. and 50c. Talcum 50c. Sold everywhere. Sample each free. Address: Cuticura, P. O. Box 100, Lowell, Mass. U. S. A.

TOWN OF GLEICHEN OFFICE HOURS

9 a.m. to 12:30 p.m. and
2:30 p.m. to 5:30 p.m. Daily

Council meeting second Friday of
each month at 8 p.m.

This office will be close as follows:
Sundays, Statutory Holidays and the
last fortnight of July each year:

ALSO—

First two legal working days of each
month for meter reading and first two
legal working days following the
fifteen of month for collections, etc.,

M. MURRAY,
Secretary-Treasurer.

Father McAdam came down from
Strathmore, Sunday, and conducted the
services in St. Victor's Church. His
numerous friends were pleased to see
him once more. He will be here again
June 2nd.

Hugh Johnston came up from Okotoks
Saturday to visit his home in
Gleichen. He is still with the Royal
Bank.

Town & District

Great growing weather.

Phone 12 when you have any news.

And now for a clean tidy Gleichen
—it's up to one and all.

Geo W. Evans, who had a attack of
pneumonia, is now around again.

Mr. Cullins of Edmonton, is now
the new teller of the Commerce staff.

Yankee Plante arrived in Gleichen
Saturday from Brooks to visit his parents.

Ronald Morrow's little baby is said
to be recovering nicely from its recent
illness.

The school children fully enjoyed Arbor
day and the school grounds look
the better therefor.

Wheat seeding is now practically
completed and all under very favorable
conditions in this district.

Kathleen Greene is to give another
of her popular recitals May 17th
—that means a crowded house.

Elmer Sanders is here from Bowden
visiting his home. He was formerly
employed in the bank at Arrowwood.

A horse kicked George McBean in
the face Sunday, cutting it up some
and blacking his eyes. However, he

Arrowwood people are pleased to
learn that Dr. and Mrs. Alexander's
baby boy is now out of danger and
improving nicely.

Jas Woodworth has returned from
Victoria, B. C., and purchased a section
of land north of Strathmore. He
was formerly located near Cluny.

Glen C. House, Forest and Art McDonald
returned Tuesday from a trip
through Saskatchewan with three car-
loads of horses. He did not find the
demand for work horses very brisk.

Mr. and Mrs. R. W. Brown and
Campbell spent the week-end at Calgary.
They intended visiting his oil
leases in Turner Valley, but found the
roads impassable.

A novelty baseball dance is to be
given in the Queenstown Community
Hall on Friday, May 10th, to which
all the world is invited. Be there
and give the boys a good season's
start.

The ladies Circle of the United
Church will hold a sale of aprons
home-cooking and afternoon tea on
Saturday next, May 11th, from three
to six o'clock, in R. W. Brown's vacant
store, next to Bakery.

Now is the time of year most Gleichenite's
think of Dexter McKay. It was great how
Dexter got his school boys every spring to
sweep through the old town and make the
tin cans disappear. Dexter is now at Long
Beach, California.

For sometime past the popular
Cluny Gun Club have been disposing
of tickets for a dance in that town of
Friday, May 24th, for the purpose of
creating a building fund and are offering
a prize of a Standard Grade Winchester
pump gun to be drawn for that night.

POCKET PICKED ?

While the editor was hard at work
Tuesday afternoon, trying to dash off
news two gipsy girls appeared on the
scene and wished to tell his fortune,
but he refused. They soon retired
and a few minutes later ye editor
found that all his capital (\$4 to be
exact) had disappeared from his
pocket. He there upon let a yell and
dashed madly down the street looking
for the girls, but they had left town.
We heard this morning that all the
gipsies were in Bassano last night.
Wonder if they paid the editor of the
Bassano Mail a visit?

Kathleen Greene, the little twelve
year old Calgary girl, who so delighted
a large audience in the United
Church with her recital of "Pollyanna"
a few weeks ago will make a
return visit to Gleichen on Friday,
May 17th, when she will recite "Cap-
tain January". This is by far the
most difficult story the little lady has
yet attempted, but those who have
heard it are agreed that by all odds
it is even better than her "Pollyanna"
recital. There is no doubt that Kathleen
will be greeted with a full house
on her return, May 17th.

Senator Marcy of New York, in
1832, in the course of a speech
coined the phrase, "To the victor be
long the spoils."

Now
These Good
USED CARS
must go
Look
em
over

JUST when we think our stock of Used Cars
is away down . . . in come a lot more, taken
in on the Spring deliveries of Outstanding Chev-
rolets. And they are certainly the finest, smartest
bunch of used cars we've seen in many a long day.
But . . . good as they are . . . they have to go. And
when you look over the cars and see the prices
you'll realize they will go fast.

Come in tonight. Or as soon as you can. This
chance to save dollars on a REALLY GOOD
car is too unusual to miss.
